# **SAFETY DATA SHEET**

# Section 1 - Chemical Product and Company Information

Product Name: Ultraflex Brushable Seam Sealer

Manufacturer/Supplier:

TRANSTAR AUTOBODY TECHNOLOGIES

2040 Heiserman Dr. Brighton, MI, 48114, USA

Distributor (if applicable):

Product Code: 4162, 4164, M4162-BK

**CHEMTREC 24 Hour Emergency Phone(s):** 

USA & Canada 800-424-9300 International +1 703 741-5970

Business Phone: 800-824-2843

SDS Prepared By: Transtar Autobody Technologies

Product Use: Seam Sealer. For Professional and Industrial Use Only

Not recommended for: Not for sale to the general public

# Section 2 - Hazards Identification

## Classification of the substance or mixture

## **GHS Ratings:**

**GHS Hazards** 

Flammable liquid	2	Flash point < 23°C and initial boiling point > 35°C (95°F)
Inhalation Toxicity	Acute Tox. 4	Gases>2500+<=20000ppm, Vapors>10+<=20mg/l,
		Dusts&mists>1+<=5mg/l
Skin corrosive	2	Reversible adverse effects in dermal tissue, Draize score: >=
		2.3 < 4.0 or persistent inflammation
Carcinogen	1A	Known Human Carcinogen Based on human evidence
Reproductive toxin	1A	Based on human evidence
Organ toxin single exposure	3	Transient target organ effects- Narcotic effects- Respiratory
		tract irritation
Organ toxin repeated	2	Presumed to be harmful to human health- Animal studies
exposure		with significant toxic effects relevant to humans at generally
		moderate exposure (guidance)- Human evidence in
		exceptional cases

**GHS Precautions** 

H225	Highly flammable liquid and vapor	P101	If medical advice is needed, have
H315	Causes skin irritation		product container or label at hand
H332	Harmful if inhaled	P102	Keep out of reach of children
H336	May cause drowsiness or	P103	Read label before use
	dizziness	P201	Obtain special instructions before use
H350	May cause cancer	P202	Do not handle until all safety
H360	May damage fertility or the unborn child		precautions have been read and understood
H373	May cause damage to organs through prolonged or repeated exposure	P210	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources - No smoking
		P240	Ground and bond container and

SDS for: 4162, 4164, M4162-BK Page 1 of 13

P241

receiving equipment

equipment

Use explosion-proof electrical, ventilating, lighting and motorized

I	P242	Use only non-sparking tools
	P243	Take precautionary measures against static discharge
	P260	Do not breathe dust, mist, vapors or
	P264	spray Wash contacted skin thoroughly after
	P271	handling Use only outdoors or in a well-ventilated
	P280	area Wear protective gloves, protective clothing, eye protection, face protection and respiratory protection.
	P362	Take off contaminated clothing and wash before reuse
	P303+P361+P353	IF ON SKIN (or hair): Immediately take off all contaminated clothing. Wash skin
	P304+P340	with soap and water.  IF INHALED: Remove victim to fresh air and keep at rest in a position
	P308+P313	comfortable for breathing IF exposed or concerned: Get medical
		advice
	P332+P313	If skin irritation occurs: Get medical advice
	P370+P378	In case of fire: Use dry chemical, CO2, foam or water fog to extinguish
	P405	Store locked up
	P403+P233+P235	Store in a well ventilated place. Keep container tightly closed. Keep Cool.
	P501	Dispose of contents and container in accordance with local, regional, national and international regulations.

# Section 4 - Fist Aid Measures

**INHALATION:** If Inhaled: Remove person to fresh air and keep comfortable for breathing. If breathing difficulty persists, seek medical attention.

**EYE CONTACT:** Rinse continuously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing for a minimum of 15 minutes while holding eye lids open. If eye irritation persist: seek medical attention.

**SKIN CONTACT:** Take off all contaminated clothing immediately. Wash exposed area thoroughly with soap and water. Seek medical attention if irritation presists. Do NOT use solvents or thinners to wash off.

**INGESTION:** If swallowed, seek medical attention immediately and have product container or label at hand. DO NOT INDUCE VOMITING unless directed to do so by a physician or poison control center. Never give anything by mouth to an unconscious person.

## Most important symptoms and effects, both acute and delayed:

Eye contact: Causes serious eye irritation.

**Inhalation:** Can cause central nervous system (CNS) depression. May cause drowsiness and dizziness. May cause respiratory irritation. Exposure to decomposition products may cause a health hazard. Serious effects may be delayed following exposure.

SDS for: 4162, 4164, M4162-BK Page 3 of 13

Skin contact: Causes skin irritation.

Ingestion: Can cause central nervous system (CNS) depression. May be fatal if swallowed and enters airways.

Irritating to mouth, throat and stomach.

#### Over-exposure signs/symptoms:

Eye contact: Adverse symptoms may include the following:

Pain or irritation, watering, redness

**Inhalation:** Adverse symptoms may include the following:

Respiratory tract irritation, coughing, nausea or vomiting, headache, drowsiness/fatigue, dizziness/vertigo,

unconsciousness.

Skin contact: Adverse symptoms may include the following:

Irritation, redness.

Ingestion: Adverse symptoms may include the following:

Nausea or vomiting.

#### Indication of any immediate medical attention and special treatment needed.

Seek professional medical attention for all over-exposures and/or persistent problems.

In case of inhalation of decomposition products in a fire, symptoms may be delayed.

The exposed person may need to be kept under medical surveillance for 48 hours.

Specific treatments: No specific treatment.

**Protection of first-aiders:** No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation

# Section 5 - Fire Fighting Measures

LEL: 1.0 % UEL: 22.7 %

Extinguishing Media: Dry Chemical, Foam, CO2 or water fog.

Unsuitable Extinguishing Media: High volume water jets

**Unusual Fire and Explosion Hazards:** Vapors can travel to a source of ignition and flash back. Closed containers may explode when exposed to extreme heat or burst when contaminated with water (CO2 gas evolved). Hazards apply to empty containers. Combustion generates toxic fumes.

Hazardous Combustion Products: oxides of carbon, oxides of nitrogen, formaldehyde, toxic fume

**Special Firefighting Procedures:** Highly toxic fumes may be generated by thermal decomposition. Water runoff from firefighting can cause environmental damage. Dike and collect water used to fight fire.

**Fire Equipment:** Full fire fighter equipment including SCBA should be worn to avoid skin contact and inhalation of concentrated vapors. Minimize skin exposure.

## Section 6 - Accidental Release Measures

#### Personal precautions, protective equipment and emergency procedures:

Use personal protective equipment. Avoid breathing vapors and mist. Ensure adequate ventilation. Eliminate all sources of ignition. Evacuate personnel to safe areas. Beware of vapors accumulation to form explosive concentrations. Vapors can accumulate in low areas.

For personal protection see section 8.

#### **Environmental precautions:**

Prevent further leakage or spillage if safe to do so. Do not let product enter drains.

#### Methods and materials for containment and cleaning up:

Small Spills: Stop leak if without risk. Move containers from spill area. Use spark-proof tools and

SDS for: 4162, 4164, M4162-BK Page 4 of 13

explosion-proof equipment. Absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.

**Large Spills:** Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Contain and collect spillage with non-combustible,

absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product.

# Section 7 - Handling & Storage

**Safe Handling Measures:** Avoid contact with skin and eyes. Avoid inhalation of vapor or mist. Ground and bond container and receiving equipment. Use non-sparking tools and explosion proof equipment when handling this material. Keep away from sources of ignition - No Smoking. Use in cool, well-ventilated areas. Keep containers closed when not in use. Take measures to prevent the build up of electrostatic charge. Follow all SDS and label precautions even after container is emptied because they may retain product residues. For precautions see section 2.

**General Occupational Hygiene:** Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

**Storage Requirements:** Keep container tightly closed. Keep away from heat, sparks, open flames and hot surfaces-No Smoking. Store in a cool, dry and well-ventilated place. Do not reuse container when empty.

# Section 8 - Exposure Controls/Personal Protection

Chemical Name / CAS No.	OSHA Exposure Limits	ACGIH Exposure Limits	Other Exposure Limits
Calcium Carbonate 1317-65-3	15 mg/m3 TWA (total dust); 5 mg/m3 TWA (respirable fraction)	ACGIH has set a TWA of 10 mg/m3 (for dust containing no asbestos and <1% free silica).	NIOSH: 10 mg/m3 TWA (total dust); 5 mg/m3 TWA (respirable dust)
Petroleum Hydrocarbon Resin 68131-77-1			
Toluene 108-88-3	200 ppm TWA	20 ppm TWA	NIOSH: 100 ppm TWA; 375 mg/m3 TWA 150 ppm STEL; 560 mg/m3 STEL
Talc 14807-96-6	PEL-TWA is 20 mppcf (million particles per cubic foot of air).	2 mg/m3 TWA (particulate matter containing no asbestos and <1% crystalline silica, respirable fraction)	NIOSH: 2 mg/m3 TWA (containing no Asbestos and <1% Quartz, respirable dust)
Methyl Ethyl Ketone 78-93-3	200 ppm TWA; 590 mg/m3 TWA	300 ppm STEL 200 ppm TWA	NIOSH: 200 ppm TWA; 590 mg/m3 TWA 300 ppm STEL; 885 mg/m3 STEL
Silica Gel 63231-67-4	PEL TWA 20mppcf (80 mg/m3) %Si02		
Xylene 1330-20-7	100 ppm TWA; 435 mg/m3 TWA	150 ppm STEL 100 ppm TWA	
Titanium Dioxide (Dust) 13463-67-7	15 mg/m3 TWA (total dust)	10 mg/m3 TWA	

SDS for: 4162, 4164, M4162-BK Page 5 of 13

Ethylbenzene 100-41-4	100 ppm TWA; 435 mg/m3 TWA	20 ppm TWA	NIOSH: 100 ppm TWA; 435 mg/m3 TWA 125 ppm STEL; 545 mg/m3 STEL
Silica, Crystalline 14808-60-7			NIOSH: 0.05 mg/m3 TWA (respirable dust)

**Engineering Controls:** Ground and bond container and reciving equipment. Use explosion proof electrical, ventilation, lighting and motorized equipment. Use non-sparking tools. Ensure adequate ventilation.

**Ventilation:** General mechanical ventilation or local exhaust should be utilized to keep vapor concentrations below exposure limits (PEL & TLV). Ventilation equipment must be explosion proof.

Safe Work Practices: Eye washes and safety showers in the workplace are recommended. Avoid contact with skin and eyes. Avoid breathing vapors. Wash hands thoroughly after using and before eating, drinking or smoking. Employee education and training in the safe use and handling of this product is required under the OSHA Hazard Communication Standard 29CFR1200. Smoking in area where this material is used should be strictly prohibited. Always use protective clothing and equipment. Remove all contaminated clothing and wash thoroughly when finished working. Keep food and drink away from material and from area where material is being used. Spraying of material can cause and oxygen dificient environment. Use proper ventilation to remove vapors, mist and fumes combined with NIOSH approved respirator.

**Respiratory Protection:** When working with this material use a MSHA/NIOSH approved cartridge respirator or suitable respiratory protection to keep airborne mists and vapor concentrations below the PEL & TLV limits. When using in poorly ventilated and confined spaces, use a fresh-air supplying respirator or a self-contained breathing apparatus.

Eye/Face Protection: Use safety glasses with chemical splash goggles or faceshield.

Skin Protection: Use chemical resistant gloves.

**Body Protection:** Impervious clothing, flame retardant antistatic protective clothing. The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace. **Contaminated Gear/Hygiene Practices:** Remove all contaminated clothing and wash thoroughly when finished working. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location. Keep food and drink away from materials and from area where material is being used or stored.

# Section 9 - Physical & Chemical Properties

This mixture typically exhibits the following properties under normal circumstances:

Appearance Gray	Physical State Liquid	
Odor Organic Solvent	Odor threshold: No data available	
pH: No data available	Melting point: No data available	
Freezing point: No data available	Boiling range: 80°C	
Flash point: 16 F,-9 C	Evaporation rate: No data available	
Flammability: No data available	Explosive Limits: 1% - 23%	
Vapor Pressure: 31.3 @1732c mmHg	Vapor Density: 3.8	
Density (Lb / Gal) 10.88	Solubility: No data available	
Partition coefficient (n- No data available octanol/water):	Autoignition temperature: 404°C	
Decomposition temperature: No data available	Viscosity: No data available

# Section 10 - Stabilty and Reactivity

Reactivity: No data available

Stability: Stable under recommended storage conditions.

**Possibility of hazardous reactions:** Vapors may form explosive mixture with air. Hazardous polymerization will not occur.

Conditions to avoid: Heat, flame and sparks. Extreme temperature and direct sunlight.

## Incompatible with:

Strong oxidizers Strong bases Strong Acids

#### Hazardous products produced under decomposition:

Carbon Monoxide, Carbon Dioxide

# Section 11 - Toxicological Information

#### **Mixture Toxicity**

Oral Toxicity: 3,180mg/kg Inhalation Toxicity: 19mg/L

## **Component Toxicity**

108-88-3 Toluene

Oral: 2,600 mg/kg (Rat) Inhalation: 13 mg/L (Rat)

78-93-3 Methyl Ethyl Ketone

Oral: 2,483 mg/kg (Rat) Dermal: 5,000 mg/kg (Rabbit)

1330-20-7 Xylene

Oral: 3,500 mg/kg (Rat) Dermal: 4,350 mg/kg (Rabbit) Inhalation: 29 mg/L (Rat)

100-41-4 Ethylbenzene

Oral: 3,500 mg/kg (Rat) Inhalation: 17 mg/L (Rat)

This mixture has not been tested for toxicological effects.

#### **Acute Effects:**

INHALATION - Dizziness, breathing difficulty, headaches, & loss of coordination.

EYE CONTACT - Moderate irritation, tearing, redness, and blurred vision.

SKIN CONTACT - Moderate irritant. Can dry and defat skin causing cracks, irritation, and dermatitis.

INGESTION - Can cause gastrointestinal irritation, vomiting, nausea, & diarrhea.

## **Chronic Effects:**

May affect liver, kidney and central nervous system with repeated exposure. Prolonged or repeated exposure may

SDS for: 4162, 4164, M4162-BK Page 7 of 13

cause lung injury.
Routes of Entry

Inhalation Skin Contact Eye Contact Ingestion

**Target Organs** 

Blood Eyes Kidneys Liver Lungs Central Nervous System Skin Cardiovascular

System Respiratory System

#### **Effects of Overexposure**

Long Term Exposure

Can cause decreased pulmonary function, progressive respiratory symptoms; fibrosis (silicosis). A potential occupational carcinogen. Silicosis is a very serious lung disease and can cause with cough and shortness of breath. Silicosis can develop in a few weeks at very high exposures, or it may occur over many years with lower exposures. Silicosis can cause death. If silicosis develops, risk of developing tuberculosis is increased. The disease may progress with or without continued exposure. If it does, this can be crippling or even fatal. Very fine silica, or "silica flour" is even more hazardous. High exposures may cause lung irritation; bronchitis may develop. Continued exposure may result in emphysema, lung scarring, lung fibrosis, and tumors. A potential occupational carcinogen. Repeated exposure can cause drying and cracking of the skin. Has been implicated in certain nervous system and brain disorders characterized by weakness, fatigue, sleep disturbances, reduced coordination, heaviness in chest and numbness of hand and feet. These symptoms may develop after 1 year of exposure to vapor concentrations of 50 - 200 ppm. Improvement is gradual and may take years after exposure is discontinued. Animal tests show that this chemical is a teratogen in animals and possibly causes toxic effects upon human reproduction. Repeated or prolonged exposure to the skin may cause drying, scaling and blistering. May cause kidney disease, liver disease, chronic respiratory disease, skin disease, as follows: EB is not nephrotoxic. Concern is expressed because the kidney is the primary route of excretion of EB and its metabolites. EB is not hepatotoxic. Since EB is metabolized by the liver, concern is expressed for these tissues. Exacerbation of pulmonary pathology might occur following exposure to EB. Individuals with impaired pulmonary function might be at risk. EB is a defating agent and may cause dermatitis following prolonged exposure. Individuals with preexisting skin problems may be more sensitive to EB. There is limited evidence that EB may damage the developing fetus, and may cause mutations. Inhalation of xylene vapor and skin contact with liquid are the two most probable routes of long term exposure. Symptoms of inhalation are dizziness, headache and nausea. Long term exposure has been associated with liver and kidney damage, intestinal tract disturbances and central nervous system depression. Prolonged contact with skin can lead to irritation, dryness and cracking. Repeated exposure can cause poor memory, difficulty in concentration, and other brain effects. It can also cause damage to the eye surface. Repeated or prolonged contact with skin may cause dermatitis; drying, cracking, itching, and skin rash. May cause liver, kidney, and brain damage; decreased learning ability, psychological disorders. Levels below 200 ppm may produce headache, tiredness and nausea. From 200 - 750 ppm symptoms may include insomnia, irritability, dizziness, some loss of memory, cause heart palpitations and loss of coordination. Blood effects and anemia have been reported but are probably due to contamination by benzene.

SDS for: 4162, 4164, M4162-BK Page 8 of 13

#### Short Term Exposure

Irritates the eyes. Inhalation can cause cough, dyspnea (breathing difficulty), wheezing. Inhalation can cause irritation of the eyes and respiratory tract, causing cough and phlegm. Irritates the skin. Irritates the eyes and the respiratory tract. May affect the central nervous system. Ethyl benzene irritates the eyes, skin, and respiratory tract. Exposure to high concentrations can cause dizziness, lightheadedness and unconsciousness. Very high exposures (above the OEL) can cause difficult breathing, narcosis, coma, and even death. Swallowing the liquid may cause aspiration into the lungs, resulting in chemical pneumonitis. May affect the central nervous system. Concentration of 200 ppm can cause irritation. Inhalation: Exposure to vapor can be irritation to the nose and throat. Inhalation of vapor at concentrations above 200 ppm or 3 - 5 minutes can lead to xylene intoxication. Symptoms include headache, dizziness, nausea and vomiting. If exposure should continue, central nervous system depression characterized by shallow breathing and weak pulse can occur. Levels of 230 ppm for 15 minutes may cause lightheadedness without loss of equilibrium. Reversible liver and kidney damage in man has followed exposure to sudden high concentrations of vapor. Such high levels may also give rise to lung congestion. Exposure to extremely high concentrations (10,000 ppm or more) of xylene vapors can lead to a strong narcotic effect with symptoms of slurred speech, stupor fatigue, confusion, unconsciousness, coma, and possible death. Irritates the eyes and respiratory tract. Causes central nervous system depression. High levels of exposure may cause fatigue, weakness, confusion, euphoria, dizziness, headache; dilated pupils, lacrimation (discharge of tears); nervousness, muscle fatigue, insomnia; paresthesia; cardiac dysrhythmia, unconsciousness and death may occur. Inhalation: 100 ppm exposure can cause dizziness, drowsiness and hallucinations. 100 - 200 ppm can cause depression, 200 - 500 ppm can cause headaches, nausea, loss of appetite, loss of energy, loss of coordination and coma. In addition to the above, death has resulted from exposure to 10,000 ppm for an unknown time. Skin: Can cause dryness and irritation. Absorption may cause or increase the severity of symptoms listed above. Eyes: Can cause irritation at 300 ppm. Ingestion: Can cause a burning sensation in the mouth and stomach, upper abdominal pain, cough, hoarseness, headache, nausea, loss of appetite, loss of energy, loss of coordination and coma.

The following chemicals comprise of at least 0.1% of this mixture and are listed and/or classified as carcinogens or potential carcinogens by the NTP, IARC, OSHA (mandatory listing) or ACGIH (optional listing).

CAS Number	<u>Description</u>	% Weight	Carcinogen Rating

# Section 13 - Disposal Considerations

Product and container should be disposed of in accordance with all local, regional, national and international regulations. Contact a licensed professional waste disposal service to dispose of this material. Subject to hazardous waste generation, treatment, storage and disposal rules under RCRA, 40CFR261.

# Section 14 - Transportation Information

The following transportation information is provided based on Transtar Autobody Technologies interpretation of shipping regulations. Each shipper is responsible for identifying, naming, marking and labeling prior to offering for transport.

SDS for: 4162, 4164, M4162-BK Page 10 of 13

<b>Agency</b>	Proper Shipping Name	<b>UN Number</b>	Packing Group	<b>Hazard Class</b>

# Section 15 - Regulatory Information

The information listed in this section is not all inclusive of all regulations for this product or the chemical components of this product.

**Australia-AICS:** The following chemicals are listed:

14808-60-7 Silica, Crystalline 0.3 %

100-41-4 Ethylbenzene 0.7 %

13463-67-7 Titanium Dioxide (Dust) 0.7 %

64742-52-5 Severely Hydrotreated Heavy Napththenic Distillate- non-haz 1 to 5 %

1330-20-7 Xylene 1 to 5 %

63231-67-4 Silica Gel 3.7 %

78-93-3 Methyl Ethyl Ketone 1 to 5 %

9003-55-8 styrene,1,3-butadiene copolymer-non haz 9.1 %

14807-96-6 Talc 10 to 20 %

108-88-3 Toluene 10 to 20 %

68131-77-1 Petroleum Hydrocarbon Resin 19.2 %

1317-65-3 Calcium Carbonate 10 to 20 %

## China-SEPA (IECSC): The following chemicals are listed:

14808-60-7 Silica, Crystalline 0.3 %

100-41-4 Ethylbenzene 0.7 %

13463-67-7 Titanium Dioxide (Dust) 0.7 %

64742-52-5 Severely Hydrotreated Heavy Napththenic Distillate- non-haz 1 to 5 %

1330-20-7 Xylene 1 to 5 %

63231-67-4 Silica Gel 3.7 %

78-93-3 Methyl Ethyl Ketone 1 to 5 %

9003-55-8 styrene,1,3-butadiene copolymer-non haz 9.1 %

14807-96-6 Talc 10 to 20 %

108-88-3 Toluene 10 to 20 %

68131-77-1 Petroleum Hydrocarbon Resin 19.2 %

1317-65-3 Calcium Carbonate 10 to 20 %

#### **DSL Status:** The following chemicals are listed on the DSL Inventory.

14808-60-7 Silica, Crystalline 0.3 %

100-41-4 Ethylbenzene 0.7 %

13463-67-7 Titanium Dioxide (Dust) 0.7 %

64742-52-5 Severely Hydrotreated Heavy Napththenic Distillate- non-haz 1 to 5 %

1330-20-7 Xylene 1 to 5 %

63231-67-4 Silica Gel 3.7 %

78-93-3 Methyl Ethyl Ketone 1 to 5 %

9003-55-8 styrene,1,3-butadiene copolymer-non haz 9.1 %

14807-96-6 Talc 10 to 20 %

108-88-3 Toluene 10 to 20 %

68131-77-1 Petroleum Hydrocarbon Resin 19.2 %

## **HAPS:** This formulation contains the following HAPS:

100-41-4 Ethylbenzene 0.7 %

1330-20-7 Xylene 1 to 5 %

108-88-3 Toluene 10 to 20 %

**NDSL Status**

NJ RTK: The following chemicals are listed under New Jersey RTK

14808-60-7 Silica, Crystalline 0.3 %

100-41-4 Ethylbenzene 0.7 %

13463-67-7 Titanium Dioxide (Dust) 0.7 %

1330-20-7 Xylene 1 to 5 %

78-93-3 Methyl Ethyl Ketone 1 to 5 %

14807-96-6 Talc 10 to 20 %

108-88-3 Toluene 10 to 20 %

1317-65-3 Calcium Carbonate 10 to 20 %

#### **California Proposition 65**

MARNING: This product can expose you to chemicals including

108-88-3 Toluene 10 to 20 %

, which is[are] known to the State of California to cause birth defects or other reproductive harm. For more information go to www.P65Warnings.ca.gov.

## California Proposition 65

**MARNING:** This product can expose you to chemicals including

14808-60-7 Silica, Crystalline 0.3 %

100-41-4 Ethylbenzene 0.7 %

13463-67-7 Titanium Dioxide (Dust) 0.7 %

which is[are] known to the State of California to cause cancer. For more information go to www.P65Warnings.ca.gov.

#### **PA RTK:** The following chemicals are listed under Pennsylvania RTK:

14808-60-7 Silica, Crystalline 0.3 %

100-41-4 Ethylbenzene 0.7 %

13463-67-7 Titanium Dioxide (Dust) 0.7 %

1330-20-7 Xylene 1 to 5 %

63231-67-4 Silica Gel 3.7 %

78-93-3 Methyl Ethyl Ketone 1 to 5 %

14807-96-6 Talc 10 to 20 %

108-88-3 Toluene 10 to 20 %

1317-65-3 Calcium Carbonate 10 to 20 %

## SARA 312: This Product contains the following chemcials subject to the reporting requirements of SARA 312:

100-41-4 Ethylbenzene 0.7 %

64742-52-5 Severely Hydrotreated Heavy Napththenic Distillate- non-haz 1 to 5 %

78-93-3 Methyl Ethyl Ketone 1 to 5 %

108-88-3 Toluene 10 to 20 %

## SARA 313: This Product contains the following chemcials subject to the reporting requirements of SARA 313:

100-41-4 Ethylbenzene 0.7 %

64742-52-5 Severely Hydrotreated Heavy Napththenic Distillate- non-haz 1 to 5 %

108-88-3 Toluene 10 to 20 %
